EuroCC Tutorial on Using Large Language Models (LLM) for Private Data - part 2

Friday, 11 September 2026 15:45 (105)

The tutorial will explore the possibilities of utilizing LLMs for interacting with private data. We will introduce tools that enable harnessing the power of generative AI in scenarios where no data can leave your execution environment at any point. We explore the architecture and data requirements for creating your private Chat-GPT, leveraging semantic understanding while maintaining control over your data.

Hands-on requirements: laptop with working Wi-Fi, up-to-date web browser, SSH client.
