

# International Conference on Free Electrons Laser Applications in Infrared and THz Studies of New States of Matter

## Wednesday 06 July 2022

Wed 06/07 Afternoon 1/ Abstract ID - Róža (13:55-15:20)

time	[id] title	presenter
13:55	[14] Quantum GaAs/AlGaAs superlattice: multiphoton and high-frequency gain effects at room temperature	Prof. VALUŠIS, Gintaras
14:40	[15] Towards THz communications: channel characteristics and uncertainties	TAMOŠIŪNAITĖ, Milda
15:00	[61] Terahertz spectroscopy of two-dimensional plasmons in grating-gated AlGaN/GaN heterostructures	KAŠALYNAS, Irmantas
