

## **LUMI: the EuroHPC pre-exascale system of the North**

*Thursday, 14 October 2021 13:00 (60)*

The EuroHPC initiative is a joint effort by the European Commission and partner countries to establish a world-class ecosystem in supercomputing to Europe (read more at <https://eurohpc-ju.europa.eu/>). One of its first concrete efforts is to install the first three “precursor to exascale” supercomputers. Finland, together with 9 other countries from the Nordics and central Europe, will collaboratively host one of these systems in Kajaani, Finland.
